EXPERIENCE

Baltimore Orioles

Software Developer Co-Op

June 2025 - Present

Baltimore, MD

- Utilize web development frameworks such as Django and React to maintain an internal web application which provides necessary tools and data to upper management, scouts, analysts, trainers, and players within the organization.
- Collaborate with an advanced technical team to develop and deploy functional updates, enhancing the application's capabilities and supporting the team's operational needs.
- Leverage SQL to manage and query databases, optimizing data retrieval processes to support analytics and decision-making for the coaching staff.
- Execute bug fixes and implement cosmetic updates based on user feedback, ensuring a seamless and efficient interface for various stakeholders within the organization.
- Utilize AWS S3, Lambda, and Fargate to automate process that assist in player development and game preparations.
- Apply advanced knowledge of professional baseball to inform development decisions, ensuring the application meets all needs of the organization.

University of Maryland Mathematics Department

Research Assistant under Dr. Yanir Rubinstein

May 2024 - May 2025

College Park, MD

- Assisted in research using Prime Color Optics cameras and Theia3D software to capture high-definition videos of basketball players taking shots and accurately identify and track the location and rotation of each limb of the shooters.
- Processed and analyzed data on shooter limb positions, leveraging strong skills in Python and key libraries including Pandas, NumPy, Matplotlib, and Plotly.
- Applied advanced concepts in linear algebra and geometry as well as coding expertise to construct 3D representations of the shot environments solely from video data.
- Contributed to the development of visualizations and analytical reports to support research findings.

Highmark Health

Application Developer Intern

May 2023 - January 2024

Pittsburgh, PA

- Worked with business analysts to gather requirements and design solutions.
- Developed and implemented Apex classes and triggers in Salesforce CRM.
- Created and managed custom objects and fields.

PERSONAL PROJECTS

Time Series Analysis of Box Scores

May 2024

Final project for MATH498R "Mathematics of Sports Performance Analytics" (completed with classmate Arthur Lin)

- Tools & technologies used: Python, Pandas, Numpy, Scikit-Learn, NBA API, Latex
- Tracked personal and team statistics over time during NBA games and seasons and explored the formulas of many advanced statistics. Utilizing the NBA's public API, we tracked how a player or team's traditional and advanced stats accumulated throughout the course of a game or season. Finally, we used regression techniques to approximate the formulas for true shooting percentage, which has a known formula, and Player Production Average (PPA), which has an unknown formula. All code, Latex, and the final paper can be found on Github.

EDUCATION

University of Maryland, College Park

B.S. in Computer Science and Mathematics

2025

GPA: 3.89

TECHNICAL SKILLS AND INTERESTS

Languages: Python, R, SQL, Java, Javascript, Ruby, OCaml, Rust, C, Swift, Apex

Developer Tools: Salesforce

Frameworks: Python - Pandas, Numpy, Scikit-Learn, Django; Javascript - React.js; SQL - Postgres, MSSQL

Coursework (completed with A±): Introduction to Artificial Intelligence, Introduction to Machine Learning, Introduction to Data Science, Mathematics of Sports Performance Analytics, Application of R for Data Science, Databases For All (SQL), Applications of Linear Algebra, Advanced Calculus I, Theory and Methods of Statistics

Areas of Interest: Data science, sports analytics, performance evaluation
